

"In the Best Buy Teen Tech Center, in the studio, we learn audio engineering to record our own music. On the computers, we learn different platforms like Adobe Illustrator and Photoshop, where we are able to make our cover art for our music. We also learn how to monetize our own platform. My sister and I have our own songs, our own YouTube channels, and we own 100% of our masters. It makes a big difference with the platforms we learn and when we are able to copywrite our music, we are able to grow and better our skill set. When we learn how to copywrite, we learn how to be our own." - Participant from Prominent Youth of America
